<p>I'll Give You the Sun by Jandy Nelson - Jude and her twin Noah were incredibly close - until a tragedy drove them apart. Then Jude meets a captivating new art mentor who helps her see things differently.</p> <p>The Goldfinch by Donna Tartt - Theo is tormented by an unbearable longing for his dead mother, and clings to the thing that most reminds him of her: a stolen, captivating painting that ultimately draws him into the criminal underworld.</p> <p>Fire Colour One by Jenny Valentine - Iris's father, Ernest, is at the end of his life and she hasn't even met him. Now her mother has declared war and means to get her hands on Ernest's priceless art collection. But Ernest has other ideas.</p> <p>Picture Us in the Light by Kelly Loy Gilbert - Danny has always been an artist and it seems his path is set to pursue the career of his dreams. When Danny digs deeper into his parents' past, he uncovers a secret that disturbs the foundations of his family history and everything he loves is in danger of being stripped away.</p> <p>Girl with a Pearl Earring by Tracy Chevalier - Griet, the young daughter of a tilemaker in 17th century Holland, obtains her first job as a servant in Vermeer's household. She loves being drawn into his artistic life, but the cost to her own survival may be high.</p>	<p>A Forger's Tale: confessions of the Bolton Forger by Shaun Greenhalgh - The definitive account of Britain's most successful and infamous forger, a man whose love for art saturates every page of this extraordinary memoir.</p> <p>Francis Bacon by Andrew Brighton - Penetrating the seeming horror of Bacon's painting this book reveals the ideas, the beliefs and the life that formed one of the most successful artists of the twentieth century.</p> <p>Abstract Expressionism by Uta Grosenick - With featured works from 20 key Abstract Expressionist artists, this book introduces the movement which shifted the center of art gravity from Paris to New York and remains for many the golden moment of American art.</p> <p>Sketchbooks : The Hidden Art Of Designers, Illustrators And Creatives by Richard Brereton - Provides a revealing glimpse into the inner workings and private inspiration of creatives from the world of advertising, design, graphic design, fashion design, art, street art, and illustration.</p> <p>Modern Art by Laszlo Taschen - A year-by-year succession of the ground-breaking artworks that shook standards, and broke down barriers. Introductory essays outline the most significant and influential movements alongside explanatory texts for each major work and its artist.</p>

Fiction Books	Non-Fiction Books
<p>Blackfish City by Sam J. Miller - After the climate wars, a floating city was constructed in the Arctic Circle. Once a remarkable feat of mechanical and social engineering, it is now rife with corruption and the population simmers with unrest. Into this turmoil comes a strange new visitor - a woman accompanied by an orca and a chained polar bear.</p> <p>The New Boy by Paula Rawsthorne - When Zoe falls for the new boy at school, she discovers a dark secret about him which explains why he seems so perfect.</p> <p>Jinxed by Amy McCulloch - A girl with a genius for engineering gets more than she bargained for when the abandoned robotic pet she finds and repairs turns out to be part of a massive conspiracy.</p> <p>Killer T by Robert Muchamore - Follows the lives and relationship of Harry and Charlie from early teens to young adulthood as the world around them begins to unravel due to deadly epidemics of gene-edited diseases.</p> <p>Doctor WHO: Thirteen Doctors, Thirteen Stories - A collection of stories following each of the Doctors.</p>	<p>The Secret World of the Brain by Catherine Loveday - delves into how we use our brains in everyday life and uncovers the crucial workings of this vital organ.</p> <p>How to Build a Universe by Brian Cox and Robin Ince - A hectic leap through the grand and bizarre ideas conjured up by human imagination, from dark matter to consciousness via neutrinos and earthworms.</p> <p>The Science Book by Dorling Kindersley - explanations that cut through the jargon, step-by-step diagrams that untangle knotty theories, classic quotes that make scientific discoveries memorable.</p> <p>The Third Chimpanzee by Jared Diamond and Rebecca Stefoff - Looks at the evolution of humans, the traits that set us apart from other primates as well as traits which we still share with them, and what the future holds for mankind.</p> <p>30-Second Elements by Eric R Scerri - The 50 most significant elements, each explained in half a minute.</p>
